CULTURE SUGGESTIONS

Work soil at least 18 inches deep; use liberal amount of well decayed manure. Cow manure is best. Use sprinkling of lime and bone; plant seed about $1\frac{1}{2}$ to 2 inches deep in a well firmed soil that is good and moist, but not sticky. Peas will not do well in too loose a soil. Plant one inch apart and later thin to about 6 inches. Do not water until seeds have begun to germinate. After germination has taken place give a good soaking. **MOST FAILURES ARE CAUSED BY WATERING BEFORE SEED HAS SPROUTED.** If weather is hot use some kind of shading. Protect young plants from birds outdoors. Look for Green Aphids regularly as this insect is the worst enemy. Spraying with nicotine, one part nicotine to 400 parts water with spray gun is best. There are also many other good insecticides which are excellent for the control of Aphids. Give young plants substantial supports in order that they may climb and produce good flowers. Poor flowers with crooked stems are worthless. Liquid manure feeding after they come in bloom will lengthen the flowering period and produce better flowers. Pick all flowers daily as this also lengthens the flowering period. Always keep the surface earth loose and never allow a crust to form. If grown indoors keep ventilators open to keep the air as dry as possible. A house that is kept damp and sultry will cause too much growth and the sweet peas will not bloom as soon as they should, and then will begin to bloom too high up. Early sweet peas usually bloom from 75 to 100 days after seed is planted. Leading commercial colors are in order named: Pink, Lavender, White, Salmon, Orange, Blue, Red. Other colors should be used in lesser quantities. One ounce of Sweet Pea Seed will plant about 25 feet of row.

TO THE TRADE

Again pointed slurs have been printed in at least one firm's catalogue belittling our seed and our efforts. These slurs no doubt will hurt our trade to some extent, if we remain silent and ignore same, as we have in the past. We ask our friends and customers to give us a fair trial, buying seed for seed from any firm and planting row for row in comparison, and at the same time. We are sure you will find ours equal to ANY you can get at ANY PRICE. This is all we ask as we do not care to use slur advertising in our catalogue. We are giving you the best we have, and we are sure you will be satisfied, as in the past, and are positive you will not find better varieties of sweet peas. A few testimonials from unsolicited letters which we have on file.

NEWARK, O.

WM. ZVOLANEK & CO. This is to tell you we displayed Sweet Peas at the National Flower Show in Cincinnati, last March. The awards had already been made. However, the Judges received the display and gave us a Certificate of Honorable Mention. The Giant Monarch and Duplex Navy were unusually attractive.

, and each were sure they must have been their seeds. The Giant Perfection developed perfectly.

Yours, —MRS. H. S. R.
PORTLAND, OREGON. JULY 20, 1931

I received your seeds which are growing very good. We had some seeds from another company, of which grew two or three inches and then died, so we prefer seeds from your company.

Thanking You, I am. —T. I. N. F. & CO.

Your peas grow wonderfully well here. Yours, R. J. W.
RIDERWOOD, MD., AUGUST 19, 1930.

Your seed has always given me wonderful results altho' my orders are not for large quantities at one time, I would use no other. The seed just received, I have planted for Christmas blooms and everyone has germinated perfectly and produced most promising stocky plants.

ZVOLANEK'S SUPER ROSE — (William Zvolanek)

—We have experimented with this rose pink shade for the past four years and have made daily comparison with other varieties of the same shade and have found it superior in all cases with other rose pinks. Seed of this variety is also very large, in fact nearly twice as large as other sweet pea seed. The color is slightly deeper than Zvol. Pink with large bold flowers on extra long stems and usually starts with four flowers to a stem. Plants are of strong growth and free flowering. This variety is absolutely the best we have ever seen for the florist according to our ideas.
